Achieve your sustainability goals

Evolve to a responsible cloud

- Help advance a low-carbon future
- Build your applications on sustainable cloud infrastructure with a local impact
- Transition to a more carbon-neutral grid with Azure

Up to 98% improvement in
carbon efficiency over
traditional datacenters

Uncompromising
commitment to 100%
renewable energy by 2025

Water positive and zero
waste by 2030

Transparent reporting with
Microsoft Sustainability Calculator

Achieve the scale and availability you need

Embrace the Azure of tomorrow

Innovating services for your cloud workloads

Innovating infrastructure

Support future growth with innovations such as:

- Underwater datacenters
- Azure Modular Datacenters
- Liquid immersion cooling projects
- Hydrogen fuel cell technologies

Azure Space

- Innovate where you never could before with cloud capabilities that extend into space
- Push your mission to the ultimate edge, achieving more both on and off the planet

Next-generation hardware

- Deliver innovation at scale with Project Olympus, the next-generation hyperscale cloud hardware design and new model for open-source hardware development
- Accommodate a broad variety of workloads for the cloud of today and tomorrow

Data for tomorrow

- Project Silica
- Project HSD: Holographic Storage Device for the Cloud
- Palix, DNA Storage

Innovate anywhere with Azure

- Hybrid and multicloud
- End-to-end data platform
- Cloud native development
- Developer velocity
